

Rechnen mit Brüchen

Ganzes = 1

Dreiviertel = $\frac{3}{4}$

Halbes = $\frac{1}{2}$

Viertel = $\frac{1}{4}$

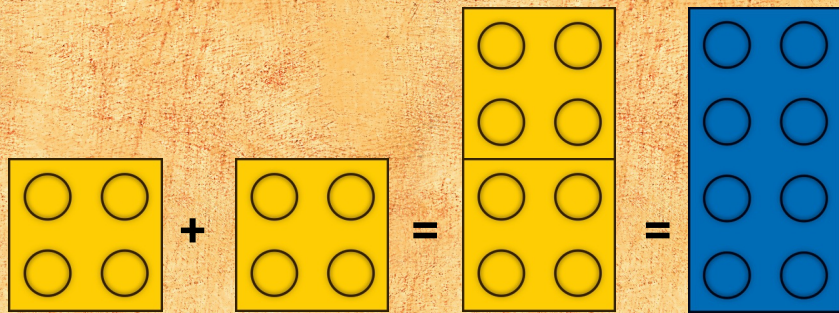

Achtel = $\frac{1}{8}$

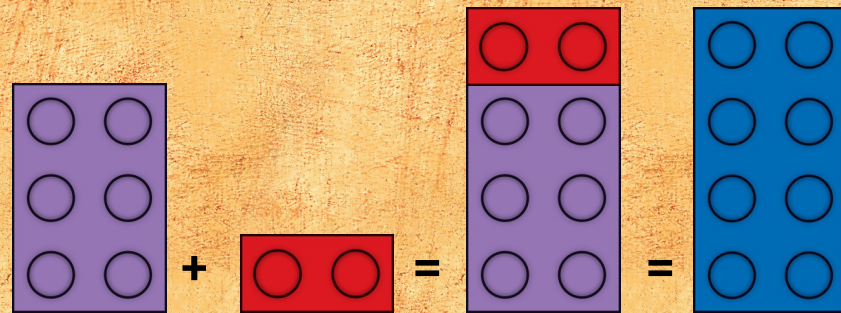

$$\frac{1}{8} + \frac{1}{8} = \frac{2}{8} = \frac{1}{4}$$

$$\frac{1}{4} + \frac{1}{4} = \frac{2}{4} = \frac{1}{2}$$

$$\frac{1}{2} + \frac{1}{2} = \frac{2}{2} = 1$$

$$\frac{3}{4} + \frac{1}{4} = \frac{4}{4} = 1$$
